Learning together and worshipping together*

Remote education at Tushingham-with-Grindley C of E Primary School

Remote education provision: information for parents

This information is intended to provide clarity and transparency to pupils and parents or carers about what to expect from remote education where national or local restrictions require entire cohorts (or bubbles) to remain at home.

For details of what to expect where individual pupils are self-isolating, please see the final section of this document.

The remote curriculum: what is taught to pupils at home

A pupil's first day or two of being educated remotely might look different from our standard approach, while we take all necessary actions to prepare for a longer period of remote teaching.

What should my child expect from immediate remote education in the first day or two of pupils being sent home?

Pupils will be directed to appropriate online learning activities, for example, Oak National Academy Online, BBC Bitesize, Reading Eggs, Mathletics.

Following the first few days of remote education, will my child be taught broadly the same curriculum as they would if they were in school?

We teach the same curriculum remotely as we do in school.

Remote teaching and study time each day

How long can I expect work set by the school to take my child each day?

We expect that remote education (including remote teaching and independent work) will take pupils broadly the following number of hours each day:

Key Stage 1	3 hours per day
Key Stage 2	4 hours per day

Accessing remote education

How will my child access any online remote education you are providing?

Via Google Classroom

If my child does not have digital or online access at home, how will you support them to access remote education?

We recognise that some pupils may not have suitable online access at home. We take the following approaches to support those pupils to access remote education:

All families have confirmed they have access to Google Classroom.

How will my child be taught remotely?

We use a combination of the following approaches to teach pupils remotely including:

- recorded teaching (e.g. Oak National Academy lessons, video/audio recordings made by teachers)
- printed paper packs produced by teachers (e.g. workbooks, worksheets)
- commercially available websites supporting the teaching of specific subjects or areas, including video clips or sequences

Engagement and feedback

What are your expectations for my child's engagement and the support that we as parents and carers should provide at home?

We expect pupils to engage with the remote learning activities set by their teachers.

We expect parents to support their child's education at home by ensuring children access the home learning activities set by their teachers.

How will you check whether my child is engaging with their work and how will I be informed if there are concerns?

We will check pupils' engagement with remote education through Google Classroom at least weekly.

Where engagement with remote education is a concern, follow up phone calls, text messages and / or emails will be sent after an appropriate period of time.

How will you assess my child's work and progress?

Feedback can take many forms and may not always mean extensive written comments for individual children. For example, whole-class feedback or quizzes marked automatically via digital platforms are also valid and effective methods, amongst many others. Our approach to feeding back on pupil work is as follows:

Positive marks acknowledging receipt of work with pupils receiving feedback at least weekly.

Additional support for pupils with particular needs

How will you work with me to help my child who needs additional support from adults at home to access remote education?

We recognise that some pupils, for example some pupils with special educational needs and disabilities (SEND), may not be able to access remote education without support from adults at home. We acknowledge the difficulties this may place on families, and we will work with parents and carers to support those pupils in the following ways:

Differentiated home learning activities set.

Remote education for self-isolating pupils

Where individual pupils need to self-isolate but the majority of their peer group remains in school, how remote education is provided will likely differ from the approach for whole groups. This is due to the challenges of teaching pupils both at home and in school.

If my child is not in school because they are self-isolating, how will their remote education differ from the approaches described above?

Work will be set for children to complete at home via Google Classroom. Regular wellbeing calls to ensure children are engaging with all activities set.
